Intent

Ormiston Herman Academy believes that art is a vital part of children's education and has a significant and valuable role in the curriculum, as well as the enrichment opportunities we offer our pupils. The art curriculum will develop children's critical abilities and understanding of their own and others' cultural heritages through studying a diverse range of male and female artists.

Children will develop their understanding of the visual language of art with effective teaching and considered sequences of lessons and experiences. Understanding of the visual elements of art and design (line, tone, texture, colour, pattern, shape, 3D form) will be developed by providing a curriculum which will enable children to reach their full potential.

<u>Implementation</u>

The skills and knowledge that children will develop throughout each art topic are mapped across each year group and throughout the school to ensure progression. The emphasis on knowledge ensures that children understand the context of the artwork, as well as the artists that they are learning about and being inspired by. This enables links to other curriculum areas, including humanities, with children developing a considerable knowledge of individual artists as well as individual works and art movements. A similar focus on skills means that children are given opportunities to express their creative imagination, as well as practise and develop mastery in the key processes of art: drawing, painting, printing, textiles and sculpture.

Teaching of Art and Design Technology in Early Years Foundation Stage

In Early years, Art and Design plays a very important role in their development. Children are taught to represent their own ideas, thoughts and feelings through design and technology, art, music and dance.

They safely use and explore a variety of materials, tools and techniques, experimenting with colour, design, texture, form and function.

Teaching of Art in Key Stage 1

Pupils should be taught to;

- to use a range of materials creatively to design and make products
- to use drawing, painting and sculpture to develop and share their ideas, experiences and imagination

- to develop a wide range of art and design techniques in using colour, pattern, texture, line, shape, form and space
- about the work of a range of artists, craft makers and designers, describing the differences and similarities between different practices and disciplines, and making links to their own work.

Teaching of Art in Key Stage 2

Pupils should be taught to develop their techniques, including their control and their use of materials, with creativity, experimentation and an increasing awareness of different kinds of art, craft and design.

Pupils should be taught:

- to create sketch books to record their observations and use them to review and revisit ideas
- to improve their mastery of art and design techniques, including drawing, painting and sculpture with a range of materials [for example, pencil, charcoal, paint, clay]
- about great artists, architects and designers in history.

Impact

Within art and design, we strive to create a supportive and collaborative ethos for learning by providing investigative and enquiry based learning opportunities. Emphasis is placed on investigative learning opportunities to help children gain a coherent knowledge of understanding of each unit of work covered throughout the school. As teachers, there will be an emphasis placed on individuality and children will be given the freedom to explore art using their imaginations.

Classroom displays reflect the children's sense of pride in their artwork and this is also demonstrated by creative outcomes across the wider curriculum. The school environment also celebrates children's achievements in art and demonstrates the subject's high status in the school, with outcomes, including sculptures, enhancing the outdoor as well as indoor environment. The Art curriculum at Ormiston Herman Academy contributes to children's personal development in creativity, independence, judgement and self-reflection.
