Mental Maths Challenge

Wednesday 5th March

Maths Reasoning 2

1. Read your question carefully.
2. Find the numbers in the question, circle them.
3. Calculate what the question is asking you to do.
4. Answer the question.

If you have finished:
Read through each of your questions and check that you have answered them carefully. Have you used the correct method?

Thursday 6th February

Spellings

Listen carefully to the word, think about the sounds you can hear.

Think back to when we have learnt certain sounds and the words that we find them in.

Sound out the word to yourself, use your phonics skills to decode the word.

Thursday 6th February

T.B.A.T. present a completed informal letter.

Write up your informal letter in best for display.

Start with your introduction first from the 16/17th January.

Thursday 6th February

Q. Why did Jesus use stories to help people understand his message?

Who won in the battle between David and Goliath?
Explain why.

Explain why Esther was an unlikely person to be chosen.

When Jesus grew up he became a preacher who wanted to spread a religious message.

He sometimes gave speeches to many hundreds of people and told them how to change their lives to please God.

Sometimes he used stories called **Parables** to help people understand his message better.

The people he spoke to would find it difficult to understand big, religious ideas
– *how does a story help them to understand?*

Let's do a **Story**
Whoosh of Jesus
telling the story of
The Good
Samaritan.

*What do you think
he wanted people
to take away from
this story?*

This is a painting of the story of The Good Samaritan by Vincent Van Gogh.

Re-tell the story of The Good Samaritan to the person next to you.

Why was it hard for people to believe a Samaritan was the one who helped?

Who does Jesus mean when he asks people to help their “neighbour”?

Thursday 6th February

Q. How can I keep my teeth healthy and what are the benefits of doing so?

How often should we brush our teeth?

When should we brush our teeth?

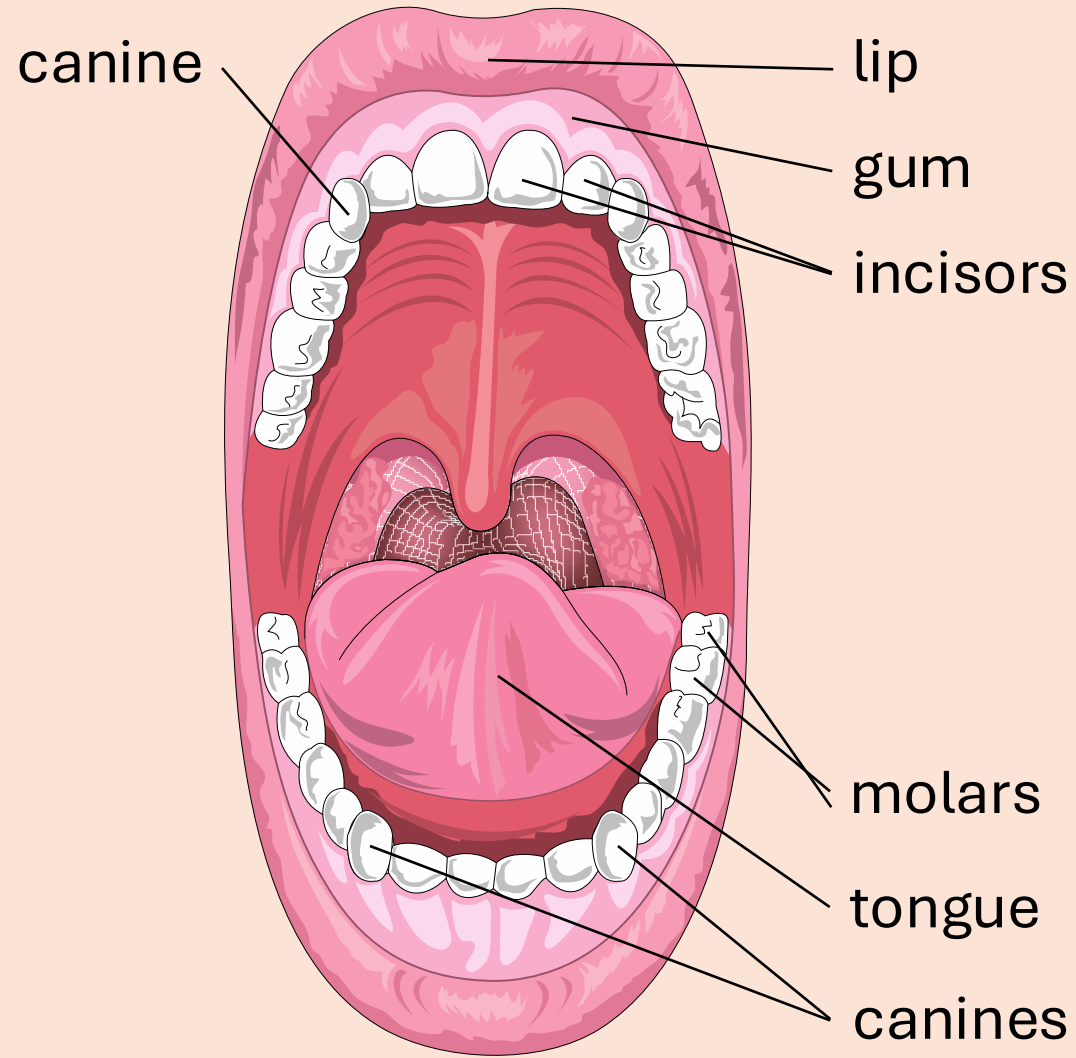

Explain why it is important to brush our teeth.

What teeth are actually in my mouth?

Using a mirror, look at your teeth.

Which teeth do you think are trickiest to clean? Why?

How to keep your teeth clean and have good oral hygiene

How to brush your teeth

Use a small amount of toothpaste

Brush the outside surface of all teeth using circular motions

Brush the outer surface of all teeth using up and down motion

Repeat for inner surface of all teeth

Brush the chewing surface of all teeth for 2 minutes twice a day

Brush the tongue

Rinse out your mouth using water

Congratulations!
Note: remember to floss.

What are all the things we need to do to keep our teeth healthy?

Answer the following questions as a class.

Flossing – what’s this?

Brush teeth – for how long?

Visiting the dentist regularly – how often?

Not eating too much sugar – why?

Thursday 30th January.

Q. Which drink causes the most tooth decay?

Continued on Thursday 6th February

Activity Part 1

Today, we will **investigate** which drink causes the most decay to our teeth.

We can't use real teeth for this investigation, so we will use **hard-boiled eggs** and put them in different liquids to see what happens. This is because the shell of an egg is similar to the enamel on our teeth.

First, we need to plan our investigation.
Complete the planning sheet with your partner.

Activity Part 3

Finally, we need to communicate our results.

This could be done in a number of ways:

- a letter
- poster
- email
- newspaper article
- text message

Keywords:

**liquid, egg shell, protect, damage, acid,
enamel, method, prediction,
bacteria, tooth decay**

Thursday 30th January.

Q. Which drink causes the most tooth decay?

Type of Liquid	Description of the Egg
Water	
Orange Juice	
Coca-Cola	
Vinegar	
Milk	
Coffee	

Thursday 30th January.

Q. Which drink causes the most tooth decay?

Write up the results from the investigation as a letter to a dentist.

Describe the details and findings from the experiment.

Dear Dentist,

Today we carried out an investigation to see which liquid damaged our teeth the most.

This is what we did:

This is what we found out:

We hope you find our results helpful!

Yours Sincerely,
