Flashcards

TBAT: read and write words with the /ee/ and /ea/ grapheme.

Wednesday 22nd October 2025

ee

twinkl.co.uk

ea

twinkl.co.uk

1) Rule 17: Explanation

The most common way to spell the long 'e' sound is 'ee' and 'ea'. Whilst these digraphs are mainly found in the middle of the words, they can also sometimes be found at the end of words.

bee sleep feel sleeve teeth

neat cheat dream beach sea

2) Rule 17: Examples

There is no clear rule explaining when to use 'ee' or 'ea' so we need to practice the spelling both ways and decide which looks right.

Circle the spelling you think is correct.

sheep / sheap

peach / peeech

heat / heet

queeen / queean

3) Rule 17: Practise

Add 'ee' or 'ea' to these words. Then, match the word to the correct picture.

Starter

ladybird

Carnivores, herbivores and omnivores

Check

Carnivores eat ...

a

plants and other animals.

b

only other animals.

c

only plants.

Carnivores, herbivores and omnivores

Which of these animals is a carnivore?

ladybird

deer

golden eagle

Carnivores, herbivores and omnivores

Which of these animals is a herbivore?

squirrel

tortoise

lion

Blue/ Green

Sofia and Andeep are talking about Sofia’s dog, Rex.

Rex loves sausages and bacon so I know that he must be a carnivore.

Sofia

I don’t think he’s a carnivore because he also eats carrots and green beans.

Rex

Andeep

- Carnivore
- Omnivore
- herbivore

Who do you agree with? Why?

I agree with because

Task B

Carnivores, herbivores and omnivores

Feedback

Who do you agree with? Why?

Andeep

I don't think Rex is a carnivore because he also eats carrots and green beans.

Andeep is correct. Carnivores only eat meat. Rex also eats some fruits and vegetables. This means that dogs are not carnivores.

Dogs eat fruit and vegetables as well as meat, so they are omnivores.

Naming and grouping animals

Explanation

Izzy is reading a book about animals.

She decides to put the animals into groups by what they eat.

When we put animals into groups, this is called grouping.

Izzy

Naming and grouping animals

Explanation

Izzy has grouped all of the carnivores.

Izzy

Carnivores are animals that eat other animals.

carnivores

polar bear

shark

cat

snake

frog

Do you know the names of these carnivores?

Summary What animals eat

Different animals eat different types of food.

A herbivore is an animal that eats only plants.

A carnivore is an animal that eats other animals.

An omnivore is an animal that eats both plants and other animals.

Animals can be grouped according to what they eat.

Independent:
